PSEO

Expanding Opportunities

A PSEO Information Gap Report

March 16, 2022

A new analysis of Minnesota's statewide PSEO Information Gap.

By Zeke Jackson
Executive Director, People for PSEO

Executive Summary

This report finds that the majority of Minnesota public schools do not follow PSEO state law. State statute [124D.09, Subd. 7](#) requires district and charter schools to annually provide “up-to-date information” to students and families about the Post-Secondary Enrollment Options (PSEO) program on their website. This is the first report to examine and report on every relevant Minnesota district and charter high school website. (Appendix 2 provides individual district/school results). Our research demonstrates a **PSEO Information Gap** across the state of Minnesota by measuring 390 school district and charter school websites.

PSEO can be a strong part of Minnesota’s efforts to close high school and post-secondary graduation gaps. PSEO also is valuable for high school students and families. It saves them \$60 million annually ([Misukanis 2020](#)). Minnesota students need up-to-date information to make informed decisions about PSEO participation. Since 2015, MDE annually has reminded high school leaders to follow the law by sharing up to date information with students and families on their website and in other materials. **We find that these efforts have been insufficient.**

Our analysis of 390 district and charter websites found that:

1. **Only 40.3% of websites are up to date and fully comply with state law.**
2. Thirty-five websites (9.0%) provide factually inaccurate information about PSEO.
3. There is a difference in compliance rates between district and chartered public schools. While 72.5% of charter public schools are up to date, only 33.3% of districts are up to date.
4. Of the 363 websites that provide some PSEO information, 158 are missing recent amendments to PSEO law made in 2019 (**43.5%**) and 85 websites don’t inform readers that a transportation fund exists for low-income families (**23.4%**).
5. Twenty-seven (6.9%) websites don’t provide any information about PSEO.

It is time to end the state’s tolerance of institutions that do not follow state law.

Based on this report’s findings, People for PSEO recommends:

1. **The Minnesota Department of Education** should review and apply appropriate enforcement mechanisms (such as that found under [MN Statute 127A.42](#)) to district and charter public schools that do not satisfy their statutory obligations.
2. **The Minnesota Department of Education** should conduct a public awareness campaign with People for PSEO and other groups to close the PSEO Information Gap and increase school compliance with PSEO law during the 2023-24 and 2024-25 academic years.
3. **The Minnesota State Legislature** should (1) require PSEO information to be “searchable” on district websites and (2) support amendments to PSEO law that promote public awareness, such as removing the college gag rule ([124D.09, Subd. 9\(a\)](#)) that restricts colleges from informing students about the financial benefits of PSEO.

PSEO Information Gap Report Results:

Is the High School Website Up to Date?

Yes	157 websites	40.26%
No	233 websites	59.74%
Total	390 websites	100.0%

Key Findings

Correct and up to date	153 websites	39.23%
Correct and up to date; Contains inaccurate information	4 websites	1.03%
Missing information	175 websites	44.87%
Missing information; Contains inaccurate information	31 websites	7.95%
PSEO Page cannot be found	25 websites	6.41%
PSEO Page link is broken	2 websites	0.51%
Total	390 websites	100.0%

Of the 363 websites that contain some information about PSEO, what percent contain important PSEO information?

Language from MDE PSEO Guidance Language	Yes	No	% Yes
By March 1 of each year, or three weeks prior to the date a student registers for courses for the following school year (whichever is earlier), schools must provide PSEO information to all students in grades 8-11 and their families.	205	158	55.8%
School districts must allow a PSEO student reasonable access to the high school building, computers and/or other technology resources during regular school hours to participate in PSEO courses, whether on-line or on campus.	168	195	46.28%
Funds are available to help pay transportation expenses for qualifying students to participate in PSEO courses on college campuses.	278	85	76.58%

Introduction

About the Post-Secondary Enrollment Options (PSEO) Program:

The PSEO program, enacted by the Minnesota Legislature in 1985, was the first dual-credit program of its kind in the nation. Today, thousands of high school students use the PSEO program to fill their high school graduation requirements while preparing themselves for work and life. PSEO accelerates timelines and reduces risks by helping students earn free college credits at the same time. To further explore the PSEO program, we encourage readers to access informational resources from the [Minnesota Department of Education](#) and from [People for PSEO](#).

Research demonstrates that enrollment in the PSEO program saves money for students and taxpayers, closes high school graduation education disparity gaps, and increases college completion rates compared to students who don't enroll in the PSEO program. According to extensive research, programs like PSEO are especially valuable to students from low income families, and students who traditionally have not entered or graduated from some form of post-secondary education. Here are just a few summaries of this research:

"Males, low-income, and low-achieving high school students all appear to benefit from participation in dual enrollment to a greater extent than their dual enrollment peers who enter college courses with more social, economic, and educational advantages. These findings indicate that dual enrollment can benefit a range of students, **and may have the greatest positive impact on those students who are often excluded from participation.**"

[CCRC at the Teachers College of Columbia University, 2008](#)

"A growing body of research suggests that allowing students in high school to complete even a single college class could significantly increase their chances of attending college and eventually graduating. After studying tens of thousands of Texas students who completed college courses in high school, this report found that these students attended and completed college within the state at much higher rates than students with similar backgrounds who did not take college courses in high school. **The theory behind dual enrollment is that enabling high school students to experience real college coursework is one of the best ways to prepare them for college success.**"

[Jobs for the Future, 2013](#)

Page 5 and 6 demonstrate with recent data from the Minnesota Department of Education that participation in the PSEO program significantly decreases disparities in high school graduation rates and college completion rates.

Minnesota Department of Education, High School class of 2019

4yr Graduation Rate	ALL STUDENTS	Rigorous Course Taking Participants*	Difference	PSEO/CE Participants -- Funding Flag	PSEO/CE Participants -- Difference

This Report Measures a PSEO Information Gap

This is the first report to look at every Minnesota district and charter public school website serving students grades 9-12 to determine if they are following the state law. This report is based on the legislative mandate that requires high schools to provide information about the PSEO program on an annual basis ([MN Section 124D.09 Subd. 7](#)).

“Subd. 7. Dissemination of information; notification of intent to enroll. By the earlier of (1) three weeks prior to the date by which a student must register for district courses for the following school year, or (2) March 1 of each year, a district must provide up-to-date information on the district's website and in materials that are distributed to parents and students about the program, including information about enrollment requirements and the ability to earn postsecondary credit to all pupils in grades 8, 9, 10, and 11. To assist the district in planning, a pupil must inform the district by May 30 of each year of the pupil's intent to enroll in postsecondary courses during the following school year. A pupil is bound by notifying or not notifying the district by May 30.”

Every year from 2015 to 2022, the Minnesota Commissioner of Education explained this law in their newsletter to Minnesota district superintendents and charter public school directors. The Commissioner has explained that:

“In an effort to provide clear and helpful guidance, below is some language that can be used on district and school websites to satisfy the obligation to notify parents and students about PSEO. By March 1 of each year, or three weeks prior to the date a student registers for courses for the following school year (whichever is earlier), a district or charter must provide up-to-date information on the district's or charter school's website and in materials that are distributed to all students and their parents in grades eight through grade 11 about the program, including information about enrollment requirements and the ability to earn postsecondary credit. This requirement applies to both districts and charter schools.”

For the past two years, the Minnesota Department of Education has included that schools should:

“Please consider the [following language](#) as the minimum to support this statute requirement; you may copy and paste directly to your website or include in materials to families.”

In addition, the Minnesota Department held two online webinars in early 2022 to help school leaders understand their responsibility to share up to date information under PSEO law. Despite the Minnesota Department of Education's valuable efforts, our research shows the majority of districts still do not follow the law.

This impacts students. How can 10th graders participate in PSEO if they aren't told they are eligible for enrollment? If students from low-income families aren't told that transportation funds are available, how will they apply? If students aren't told that they can use their school's computers to take PSEO courses, how can they choose to do so?

For many years, some PSEO students and PSEO alumni have testified that their high schools do not provide accessible information about the PSEO program. Without accessible and up-to-date information about the PSEO program, Minnesota students and families may not fully understand the dual-credit options that are available to them.

This report concludes that 233 of 390 Minnesota high school websites studied (59.7%) do not provide all the up-to-date information required by Minnesota’s PSEO law. Moving forward, the general absence of information about PSEO in Minnesota shall be referred to as the **PSEO Information Gap**. Measuring website compliance with state law is a low cost quantitative method of measuring the PSEO Information Gap.

This study was not designed to perform a comprehensive analysis of the variables that contribute to the PSEO Information Gap. Some of these variables might include, but are not limited to, technical website errors, a lack of faculty understanding of their statutory requirements, or local district policies and procedures that intentionally or unintentionally limit awareness of the PSEO program. The PSEO funding formula may play a role in incentivizing districts to minimize their PSEO enrollment in order to keep funding inside the schools.

Previous Studies of the PSEO Information Gap (2014 - 2016)

Previous studies in 2014, 2015, 2016, and 2020 carried out by the Center for School Change showed that information about PSEO is not getting to families and students.

The earliest attempt to measure the PSEO Information Gap dates to a January 2014 survey by the Center for School Change. Their report concluded that 90% of the 91 Minnesota high school websites studied were missing information about key elements of the PSEO law. This report, along with testimony from students, helped convince the 2014 Minnesota Legislature to amend the PSEO statutes to require high schools to share up-to-date information about PSEO on their website and in materials to students and families by March 1st of each year.

A year later, a 2015 report published by the Center for School Change titled, “[Students and Families Need to Know About PSEO](#),” studied the adherence of 87 school districts and chartered public schools to the new 2014 requirements and found that:

- 99% of websites/materials reviewed did not provide information on transportation assistance for PSEO students from low-income families.
- 85% of websites/materials reviewed did not provide up to date information about the 10th grade PSEO option.
- 99% of websites/materials reviewed do not provide information on the availability of online PSEO course.

The Center for School Change conducted a follow-up study in March 2016 of these same stratified random sample of 87 school district and charter websites. This report, “[Progress and Problems with PSEO](#),” found improved quality of PSEO information on high school websites:

1. 90% of websites/materials provided information on transportation assistance for PSEO students from low-income families
2. 91% of websites/materials provided information about the 10th grade PSEO option
3. 90% of websites/materials provided information on the availability of online PSEO courses

2019 PSEO Law Change and 2020 Information Gap Analysis

During the 2019 Legislative session, the March 1st [dissemination of information deadline](#) was amended to require school districts to share PSEO information by either March 1st or three weeks prior to course registration for the next academic year (whichever comes first). This change was the result of testimony by PSEO students Asiya Browne, Zeke Jackson, and

Mackenzie Pelowski that:

1. They didn't learn about PSEO until they had signed up for classes for the following academic year
2. Many colleges and universities opened PSEO applications as early as January of each year, leading some students to only learn about PSEO during end of college application periods

The most recent measurement of the PSEO Information Gap was detailed by the Center for School Change in a January 2020 report. This document, analyzing a stratified random sample of 95 high school websites was entitled, "[Dual Credit: Opportunity and Equity Indeed.](#)" This study examined the high school website adoption rates of these recent amendments to PSEO law. Among other conclusions, the report found that:

1. None of the 95 websites mention the revised notification schedule provisions adopted by the 2019 Minnesota state legislature
2. 92 of 95 districts/charters did not provide all of the legislatively required "up to date" information about PSEO, such as the requirement that high schools must allow students to use high school computers and internet resources to take PSEO courses online.

This report aims to build upon the foundation set by previous research on high school websites. Over the course of the last seven years, the high schools studied in this report have been consistently reminded of their obligations to fully inform high school students about the PSEO program.

Methodology

People for PSEO obtained a list of districts and charter schools from the Minnesota Department of Education website. From this list, we removed schools that do not serve grades 9-12. Of the remaining 388 websites, [319 are tagged](#) as Independent School Districts (ISD) and [69 are tagged](#) as Authorized Charter Schools (LEA). To this list, we added Minneapolis Public Schools and South Saint Paul School District.¹ A full list of the websites studied, as well as their compliance with PSEO law, can be found at the end of this report.

Question Analysis

The 388 websites were analyzed by People for PSEO staff and volunteers. After this data was collected, it was double-checked by separate individuals to ensure quality. Any missing or incorrect information is the sole responsibility of People for PSEO.

Factor 1: Is PSEO Information Accessible?

This analysis took a considerable amount of time due to a lack of search capabilities on high school websites. Although this is not currently required by state law, being able to search “PSEO” makes finding the information easier for students and the general public.

1. Is their PSEO information searchable?
 - a. (Yes/No)

Factor 2: Is PSEO Information Complete?

The [PSEO language shared by MDE](#) with districts and charters is considered to be, ‘the minimum to support this statute requirement.’ As such, any district website that did not contain *all* the same information as the MDE website was categorized as **not** up to date. By comparing MDE’s language to the information found on the high school PSEO page, staff and volunteers answered the following questions:

2. Is their PSEO information up to date?
 - a. (Yes/No/Unsure)
3. What is the PSEO Page Status?
 - a. (Up to date/Up to date AND inaccurate information/Missing information/Missing information AND inaccurate information/PSEO Page cannot be found/PSEO link is broken)

¹There are four exceptions to this methodology. The Minnesota Department of Education informed us that the Perpich Center for Recording Arts and Mn State Academies must follow subdivision 7, but are neither district nor charter schools. They are tagged as “ISD” for the sole purposes of this study. In addition, Minneapolis Public Schools and South Saint School Paul District were not included in the MDE list of Independent School Districts, but were included and tagged as “ISD” for the sole purposes of this study.

Factor 3: Why is PSEO Information Not Complete?

If the website was marked as either “Missing information” or “Missing information AND inaccurate information,” the following questions were answered:

4. Does the website state that, “School districts must allow a PSEO student reasonable access to the high school building, computers and/or other technology resources during regular school hours to participate in PSEO courses, whether on-line or on campus”
 - a. (Yes/No)
5. Does the website state that, “By March 1 of each year, or three weeks prior to the date a student registers for courses for the following school year (whichever is earlier), schools must provide PSEO information to all students in grades 8-11 and their families”?
 - a. (Yes/No)
6. Does the website state that, “Funds are available to help pay transportation expenses for qualifying students to participate in PSEO courses on college campuses”?
 - a. (Yes/No)

Results: Website Analysis

Using the methods described above, People for PSEO found the following results.

The Majority of Websites are Not Up to Date

In Figure 1, we categorized each website into six different categories. Figure 1 shows that only 156/388 high schools, or 40.2%, contain all the PSEO information shared [by the Minnesota Department of Education](#) and required under state law.

Figure 1: Is the website up to date according to MDE’s PSEO language requirement?

<u>Website Category</u>	Total	Percent of Total	ISD	Charter
1. Correct and up to date	153	39.23%	105	48
2. Correct and up to date; Contains inaccurate information	4	1.03%	2	2
3. Missing information	175	44.87%	161	14
4. Missing information; Contains inaccurate information	31	7.95%	28	3
5. PSEO Page cannot be found	25	6.41%	23	2
6. PSEO Page link is broken	2	0.51%	2	0
Total	390	100%	321	69

If the website did not contain all required MDE information, we labeled it as ‘missing information.’ There were 204 schools who provided some information about PSEO but were missing relevant information.

A website was labeled as ‘PSEO Page cannot be found’ after: (1) PSEO was not searchable on their website, and (2) two different people cannot find any PSEO information. Once these conditions were met, we concluded that either:

1. The high school does not have *any* PSEO information on their website, or
2. Their PSEO information is inaccessible to the average website user

When a high school website contained a link to PSEO information and the link was empty or produced an error, we categorized the website as, ‘PSEO Page link is broken.’

We Recorded 32 Inaccurate Statements about PSEO Programs

We categorized websites as containing ‘inaccurate information’ if the information provided contradicts [state law](#) or if the information was determined by the reviewer to be misleading. There are 31 websites that are both missing information and contain inaccurate information about the PSEO program. We recorded 4 websites that are up to date but that also contain inaccurate statements about PSEO.

We categorized the following statements as inaccurate. Some statements were recorded more than once across different websites.

Figure 2: Inaccurate statements relating to [Subd. 11. Participation in high school activities.](#)

Statements	Number of times recorded
<i>You can participate in activities at the high school or PSEO site, but not both</i>	2
<i>Students must remain in the school during PSEO</i>	1
<i>PSEO students are not eligible to give graduation speeches</i>	1
<i>Full-time PSEO students will not be considered for scholarships.</i>	1

Figure 3: Inaccurate statements relating to [Subd. 11a. Access to building and technology.](#)

Statements	Number of times recorded
<i>When a student enrolls in PSEO coursework the student will not be able to access school equipment, materials, teachers, or school resources</i>	1
<i>Students need to have their own internet and computer at home in order to do the homework required of a college level course.</i>	1

Figure 4: Inaccurate statements relating to [Subd. 7. Dissemination of information; notification of intent to enroll.](#)

Statements	Number of times recorded
<i>Students must provide PSEO notice to high school by March 30th</i>	3
<i>Students must notify their school by May 28 if they want to participate in PSEO for the following school year</i>	1
<i>Students must fill out and submit application forms to the principal by March 31st</i>	1
<i>The school must be notified by May 23 to enroll in PSEO the following year</i>	1

Figure 5: Inaccurate statements relating to eligibility in the PSEO program. These statements may relate to one or more places in PSEO law. Alternatively, these statements may make claims that have no basis in PSEO law.

Statements	Number of times recorded
<i>PSEO is only for 11th and 12th grade students</i>	7

<i>A PSEO student must pay for PSEO credits after taking a certain number of credits</i>	2
<i>Admission to the PSEO program is subject to staff approval on a case-by-case basis.</i>	1
<i>PSEO can only be taken through online courses - "PSEO Online"</i>	1
<i>High school can set limits on number of PSEO credits taken</i>	1
<i>Students can enroll in PSEO by taking CIS classes</i>	1
<i>You will not be allowed to take a required course at a post-secondary institution without the counselor's/principal's approval</i>	1
<i>Students must commit to PSEO for the academic entire year</i>	1
<i>A PSEO course may not be taken if the same course is offered by our College in the High School program.</i>	1
<i>A high school can remove students from PSEO</i>	1
<i>University of Minnesota TC is only for full time PSEO students</i>	1
<i>You must decide from the beginning if you will be full-time or part-time student and then stick with that plan for the whole school year.</i>	1
<i>10th grade students can only take one course</i>	1

Figure 6:

- (1) Inaccurate statements relating to GPA requirements for enrollment in the PSEO program. The Post-Secondary Institution sets GPA requirements for admission into the PSEO program.
(2) Inaccurate statements related to PSEO grades. PSEO students can continue their enrollment if they are not on track to graduate ([Subd. 8. Limit on participation](#)).

Statements	Number of times recorded
<i>The website generalizes MN State College & University GPA and/or class rank requirements to the entire PSEO program</i>	19
<i>Community colleges require seniors to be in the top 50% of their graduating class and juniors to be in the top 70%.</i>	1
<i>Students must have a 2.6 GPA to enroll in PSEO</i>	1
<i>Students must have a 2.75 GPA to enroll in PSEO</i>	1
<i>Must have a 3.0 GPA for 12th graders and a 3.3 GPA for 11th graders.</i>	1

<i>PSEO students must have a 3.2 cumulative GPA</i>	1
<i>School can stop students from doing PSEO if they get bad grades</i>	2
<i>Students can't do PSEO if they aren't on track to graduate</i>	2
<i>Students must have a 3.4 for juniors and 3.2 for seniors to enroll in PSEO</i>	1

Websites Are Missing Recent Changes to PSEO Law

Figure 7 demonstrates that, of the websites studied in this report that contain some information about PSEO, almost half are missing recent amendments to PSEO law. There were 27 websites that contained no information about the PSEO program, resulting in 363 websites studied in Figure 7.

PSEO law was most recently amended in 2019. Instead of sharing updated information about PSEO with students by March 1st, schools must now share updated information about the PSEO program by March 1st **“or three week prior”** to next year’s course registration deadline. If a website fails to share this updated information, it may be concluded that it has not been updated within the last two years.

Figure 7: What information is missing from websites?

	School districts must allow a PSEO student reasonable access to the high school building, computers and/or other technology resources during regular school hours to participate in PSEO courses, whether on-line or on campus. (Subd. 11b.)	By March 1 of each year, or three weeks prior to the date a student registers for courses for the following school year (whichever is earlier), schools must provide PSEO information to all students in grades 8-11 and their families. (Subd. 7.)	Funds are available to help pay transportation expenses for qualifying students to participate in PSEO courses on college campuses. (MDE)
Yes	168	205	278
No	195	158	85
Total	363	363	363
% Yes	46.28%	55.80%	76.58%
% No	53.72%	43.53%	23.42%

Measuring Compliance is Time-Consuming

In Figure 8, we demonstrate the percentage of school websites in which one can find PSEO information through a website search. As previously noted, this is not currently required by state law, but it does make finding the information easier for families, students, and the public. Some schools are marked as ‘No’ because their website didn’t have any search functionality. The extent to which this affected our results was not recorded.

Figure 8: Is PSEO searchable on the website?

Yes	263 websites	67.44%
No	127 websites	32.56%
Total	390 websites	100.0%

Charter Schools are More Likely to be in Compliance

Figure 9 demonstrates that charter schools are more likely to be in compliance with PSEO state law. While only 107 district schools (**33.3%**) shared up to date information about the PSEO program, 50 charter schools (**72.5%**) shared up to date information about the PSEO program.

Figure 9: How do district and charter schools differ in compliance rates??

	Yes	No	Total	% Yes
ISD	107	214	321	33.33%
Charter	50	19	69	72.46%
Total	157	233	390	40.26%

Website Examples

Through these short examples, we hope to impress upon readers the wide spectrum of quality PSEO information available to students.

Up to Date Information: [La Crescent-Hokah School District](#)

La Crescent-Hokah's website contains all information required by MDE in addition to the PSEO websites of local PSEO-participating institutions. This website is marked, 'up-to-date.' Although not required by state law, we note that this website shared information in a neutral manner that includes factors that students should consider, list the steps students need to take before and after applying to the PSEO program, and include MDE's complete list of all PSEO-participating institutions.

Missing Information: [South Koochiching School District - Indus](#)

The PSEO page of the Indus School contains some information about PSEO but is missing critical information about the program. This website is marked as 'missing information.' Although it informs students that transportation funds exist for low-income students, it does not inform students that students must receive updated PSEO information by March 1st or three weeks prior to course registration. Their page also excludes information about how PSEO students can use school technology to take PSEO classes and that PSEO students can participate in school activities.

Inaccurate Information: [Fulda High School](#)

The PSEO page of Fulda High School contains a two-paragraph explanation of PSEO that excludes critical information about recent PSEO amendments. This website is marked as 'missing information and inaccurate information.' Their website includes two letters shared with parents in 2017 (Figure 9) and 2018 (Figure 10), that contradict state law [124D.09 Subd. 11a. \(a\) and \(b\)](#), stating that, "...once a child enrolls in a PSEO class, for that part of the day the student will need to leave the school for the hour they are not enrolled in high school classes," and, "When a student at Fulda Public Schools enrolls in PSEO coursework the student will not be able to access school equipment, materials, teachers, or other school resources."

Conclusion & Recommendations

The PSEO program is important to students and the state for several reasons. PSEO can help close high school education disparity gaps, improve college completion rates, and save students millions of dollars in college costs per year ([Misukanis 2020](#)).

This analysis of district and charter websites demonstrates that access to quality online information about PSEO is highly dependent on the school in which the student is enrolled.

A majority of schools studied (**59.7%**) do not meet the dissemination of information language requirements under state law as defined by the Minnesota Department of Education. Of the 388 websites studied, 27 (**6.9%**) do not include any PSEO information at all. Although many websites may have been up to date at one point in time, we conclude that previous efforts to close the PSEO Information Gap have not been successful in ensuring that schools are updating their websites on an annual basis.

After seven years of reminders by the Minnesota Department of Education, these findings demonstrate that previous efforts to enforce PSEO state law have not been successful. The state legislature should not overlook this behavior by hundreds of Minnesota public schools - it is time to end the statewide tolerance of schools that are not following PSEO law. For this reason, we recommend the following steps to close the PSEO Information Gap:

1. **The Minnesota Department of Education** should review and apply appropriate enforcement mechanisms (such as that found under [MN Statute 127A.42](#)) to district and charter schools that do not satisfy their statutory obligations.
2. **The Minnesota Department of Education** should conduct a public awareness campaign with People for PSEO and other groups to close the PSEO Information Gap and increase school compliance with PSEO law during the 2023-24 and 2024-25 academic years.
3. **The Minnesota State Legislature** should (1) require PSEO information to be “searchable” on district websites and (2) support amendments to PSEO law that promote public awareness, such as removing the college gag rule ([124D.09, Subd. 9\(a\)](#)) that restricts post-secondary institutions from informing students about the financial benefits of PSEO.

Although this research demonstrates that schools are not fulfilling their statutory obligations, further research is needed to determine the extent to which this directly contributes to disparities in overall PSEO enrollment rates. For example, future research may attempt to identify a correlation between the participation rates of PSEO students per district and the quality of PSEO information available on their websites. Other research might work to understand the relationship between participation rates and school size or location. **However, a lack of public data on PSEO enrollment patterns prevents such research from taking place.** Districts are currently not required to submit participation rates for PSEO courses taught according to agreements. This lack of public data on the PSEO program must be solved to better understand the impact of the PSEO Information Gap on PSEO enrollment trends, high school and college graduation rates.

With these new findings, People for PSEO recommends that the Minnesota Department of Education and the Minnesota State Legislature rethink their approach to enforcing PSEO law.

Acknowledgements

Many thanks to the PSEO students and alumni (Josi, Beatrice, Rohit, Asiya, Mia, Jonah, Abby, Annie, Kunga, Luka, Addison, and Maija) for their help in gathering and categorizing the data used in this report. Major thanks to Raina Meyer for her help in managing some data collection and for contributing to the earliest drafts of this report. Thanks to Corrie Fiedler at the Carlson School of Management for her extensive feedback and comments. Thank you to the Center for School Change for conducting the earliest reports on the PSEO Information Gap. Thank you to many others for their feedback, including Robert Wedl, Rand Park, Bill Blazar, Kristy Snyder, Jo Rutkiewicz, and several others. Thank you to our PSEO donors whose support funded the publication of this report.

About People for PSEO and the Author

People for PSEO is a youth-led 501(c)3 nonprofit organization that promotes the use of the PSEO program as a means to break cycles of poverty, close education disparity gaps, and reduce postsecondary attainment costs. To accomplish this goal, we help students and parents learn about PSEO, identify and lower barriers to PSEO enrollment, and establish PSEO clubs at colleges to create a statewide PSEO community. To learn more about our mission, please visit the People for PSEO [website](#).

Zeke Jackson is a PSEO alumnus, the Executive Director at People for PSEO, and a junior at the University of Minnesota Twin-Cities.

We took the utmost care to provide accurate information in this report. Any mistakes contained within this document is the sole responsibility of People for PSEO.

Appendix 1: [Fulda High School PSEO Letters](#)

February 1, 2017

Dear Parents,

This is an informational letter about PSEO (Post Secondary Education Option) that Fulda Public School must send out notifications to all pupils in grades 8, 9, 10, 11 according to state law 124D.09 Subd 7. Each post-secondary institution determines the admission requirements.

Mr. Slaathaug will be administering the Accuplacer exam later this spring at the Fulda High School to all eligible PSEO students who have not already qualified.

A student must also notify the principal's office in writing by May 30th of his/her intent to enroll in any PSEO classes in either the fall or spring semester of the 17-18 school year. According to state law a student is bound by notifying or not notifying the district in writing by May 30th. If you have any questions please contact the school for assistance as to whether or not PSEO is a good option for your child. This requirement is not subject to college course taught at Fulda Public School.

Please keep in mind that Fulda Public cannot help register the child for their PSEO classes. It is a student and parent responsibility to talk to the college and get all necessary paper work completed for the college. Please keep in mind once a child enrolls in a PSEO class, for that part of the day the student will need to leave the school for the hour they are not enrolled in high school classes. Fulda Public Schools will not loan out equipment or facilities or staff to help complete student's class/classes. I would also like to inform the parents that we do offer several College in the School courses where students get to stay on campus and receive college credits. We ask parents to take a close look at those options as they will appear in our registration booklet coming out this spring.

Sincerely,

Gregg Slaathaug
HS Principal/AD

Family & Guardians -

This letter contains information for students in grades 8, 9, 10, and 11 at Fulda High School regarding Post Secondary Education Option, PSEO, according to law 124.D.09 Subd 7.

Accuplacer is a test given to eligible students that have not qualified for dual credit options in the past. Fulda High School will be administering the Accuplacer prior to students entering the scheduling process for the 2018-2019 school year.

In accordance with law 124.D.09 Subd 7, a pupil with the intent to enroll in postsecondary courses during the following school year needs to notify their high school principal's office in writing of their intent by May 30th of that calendar year.

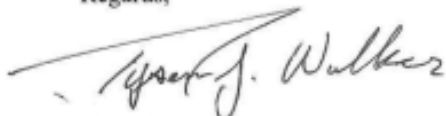

Please note that Fulda Public Schools cannot help register students for their PSEO classes. Students and families interested in PSEO will need to identify and confer with eligible post-secondary schools and follow their paperwork and criteria to gain acceptance and enroll in coursework. Post-secondary institutions determine their own admission requirements.

When a student at Fulda Public Schools enrolls in PSEO coursework the student will not be able to access school equipment, materials, teachers, or school resources. However, students and families do have the option of staying on campus during the PSEO hour. Students electing to stay on campus will be assigned a study hall and will need to follow procedures as stated in Fulda Public Schools Student Handbook.

Students that qualify for PSEO will also qualify for classes that offer dual credit options within our building. These classes will be taught by our faculty members that meet accreditation requirements. Specific classes will be offered during the normal scheduling process prior to the PSEO May 30th deadline.

If you have further questions, please contact Fulda High School at 507.425.2514.

Regards,

Tyson J. Walker
Fulda High School Principal
