2024 PSEO Information Gap Report
April 2024

A third analysis of Minnesota's statewide PSEO Information Gap.

By Zeke Jackson

Executive Summary

The Post-Secondary Enrollment Options (PSEO) program was created in 1985 and since then has been used by tens of thousands of Minnesota high school students to prepare for college, save millions of dollars in college tuition on an annual basis, access expanded course options, and get a head start on their career. Last year, in our 2023 PSEO Information Gap Report, we found that the majority of websites in Minnesota were not in compliance with a PSEO law (124D.09, Subd. 7) which requires district and charter schools to provide up-to-date information about the PSEO program on their school websites. This 2024 report builds on our findings from 2023 by reviewing PSEO information on 391 school district and charter school websites.

Key Findings

PSEO Page Status	2022	2023	2024
PSEO Page is up to date	153	163	163
PSEO Page is up to date and has inaccurate information	4	6	22
PSEO Page has missing information	175	139	122
PSEO Page has missing and inaccurate information	31	36	54
PSEO Page cannot be found	25	36	29
PSEO Page link is broken	2	10	1
TOTAL	390	390	391

Minnesota students and families need up-to-date information about the program to make informed decisions about whether to participate in PSEO. Knowing about the program can make a difference of thousands of dollars for students. Since 2015, the Minnesota Department of Education (MDE) has reminded high school leaders on an annual basis to follow PSEO law by sharing up to date information with students and families on their website and in other materials. Our measurements indicate that these efforts have resulted in little change in high school compliance rates.

Table of Contents

Introduction

About the Post-Secondary Enrollment Options (PSEO) Program:

The PSEO program, enacted by the Minnesota Legislature in 1985, was the first dual-credit program of its kind in the nation. Today, thousands of high school students use the PSEO program to meet their high school graduation requirements while earning free college credits at the same time. To further explore the PSEO program, we encourage readers to access informational resources from the Minnesota Department of Education and from People for PSEO.

Previous Research on PSEO and Dual Credit

Research demonstrates that enrollment in the PSEO program saves money for students and taxpayers, closes high school graduation education disparity gaps, and results in higher college completion rates when compared to students who don't enroll in the PSEO program. According to extensive research, programs like PSEO are especially valuable to students from low income families, and students who traditionally have not entered or graduated from some form of post-secondary education. This research demonstrates the importance of sharing up-to-date information with students and parents. Here are just a few summaries of this research:

> "...the overall growth rate of traditional PSEO programs in Minnesota is still low relative to other dual credit programs in the State. PSEO remains in third place amongst the four most popular dual credit programs: Advanced Placement (AP), International Baccalaureate (IB), and Concurrent Enrollment (CIS). Economically disadvantaged students and students of color are enrolled in PSEO at lower rates than whites and students not coming from low-income families."
>
> Barriers and Challenges to Participation in Postsecondary Enrollment Options (PSEO) for Minnesota Students, 2019

> "Some of these benefits are attributed to enhanced "academic momentum," due to students gaining confidence that they are capable of college-level work after experiencing a few courses in high school (Karp et al., 3 2008). This exposure may also allow them to develop a sense of agency and belief in their capacity to navigate the higher education system.."
>
> Identifying Best Practices to Improve Access to PSEO, 2022

> "Analyzing the revenue formulas put in place by the Legislature for the several programs, PSEO is the most cost-effective approach. In FY2021, state and local taxpayers will save an estimated $15.1 million for students taking PSEO compared to other dual enrollment programs… Under PSEO alone, a reasonable estimate [of savings for students] for FY 20-21 is $59.8 [million] annually."
>
> Dual Enrollment Programs in Minnesota, A Comparative Revenue Analysis, 2020

> "Minnesota's dual enrollment programs, through all modalities, provide students with access to college courses that make them more likely to go to college, more likely to attend college, and improve postsecondary outcomes for students and the state as a whole.."

"Program participants have been strongly motivated by monetary savings due to the program. We estimated that program participants and their parents avoided having to pay about $10.9 million for post secondary tuition, fees, books, and mate - rials in 1993-94 that would have been required if they had enrolled in postsecondary courses without the program"

<div align="right">PSEO Legislative Audit, 1996</div>

"Males, low-income, and low-achieving high school students all appear to benefit from participation in dual enrollment to a greater extent than their dual enrollment peers who enter college courses with more social, economic, and educational advantages. These findings indicate that dual enrollment can benefit a range of students, and may have the greatest positive impact on those students who are often excluded from participation."

<div align="right">CCRC at the Teachers College of Columbia University, 2008</div>

"A growing body of research suggests that allowing students in high school to complete even a single college class could significantly increase their chances of attending college and eventually graduating. After studying tens of thousands of Texas students who completed college courses in high school, this report found that these students attended and completed college within the state at much higher rates than students with similar backgrounds who did not take college courses in high school. The theory behind dual enrollment is that enabling high school students to experience real college coursework is one of the best ways to prepare them for college success."

<div align="right">Jobs for the Future, 2013</div>

The following pages demonstrate with recent data from the Minnesota Department of Education that participation in the PSEO program significantly decreases disparities in high school graduation rates and college completion rates.

4yr Graduation Rate	ALL STUDENTS	Rigorous Course Taking Participants*	Difference	PSEO/CE Participants -- Funding Flag	PSEO/CE Participants -- Difference
	% of 4yr High School Graduates	% of 4yr High School Graduates		% of 4yr High School Graduates

History of MDE Notifications to High Schools on PSEO Law

PSEO law ([MN Section 124D.09 Subd. 7](#)) mandates that high schools provide information to students and families about the PSEO program on an annual basis. The law states that,

> **"Subd. 7. Dissemination of information; notification of intent to enroll.** By the earlier of (1) three weeks prior to the date by which a student must register for district courses for the following school year, or (2) March 1 of each year, a district must provide up-to-date information on the district's website and in materials that are distributed to parents and students about the program, including information about enrollment requirements and the ability to earn postsecondary credit to all pupils in grades 8, 9, 10, and 11. To assist the district in planning, a pupil must inform the district by May 30 of each year of the pupil's intent to enroll in postsecondary courses during the following school year. A pupil is bound by notifying or not notifying the district by May 30."

Every year from 2015 to 2023, the Minnesota Department of Education has detailed this law in their newsletter to Minnesota district superintendents and charter public school directors through the [Superintendent and Charter Leader Update newsletter](#). Additionally, starting in February 2021, the MDE has provided [updated guidance](#) to districts and charter schools. This updated guidance states that,

> "This requirement applies to both districts and charter schools. Please consider the [following language](#) as the minimum to support this statute requirement; you may copy and paste directly to your website or include in materials to families."

The full language provided by MDE can be found under "Methodology." According to these newsletters, MDE held two online webinars in early 2022 to help school leaders understand their responsibility to share up to date information under PSEO law. More recently, two newsletters dated for [September 22, 2022](#) and [January 27, 2023](#) informed district and charter school leaders of their statutory obligations under PSEO law and provided registration links to attend informational sessions to support high school counselors and administrators around common PSEO topics.

Previous Studies of the PSEO Information Gap (2014 - 2023)

Previous studies done in 2014, 2015, 2016, 2020, 2022, and 2023 showed that information about PSEO is not reaching families and students.

The earliest attempt to measure the PSEO Information Gap dates to a January 2014 survey by the Center for School Change. Their report concluded that 90% of the 91 Minnesota high school websites studied were missing information about key elements of the PSEO law. This report, along with testimony from students, helped convince the 2014 Minnesota Legislature to amend the PSEO statutes to require high schools to share up-to-date information about PSEO on their website and in materials to students and families by March 1st of each year.

A year later, a 2015 report published by the Center for School Change titled, "[Students and Families Need to Know About PSEO](#)," studied the adherence of 87 school districts and chartered public schools to the new 2014 requirements and found that:
1. 99% of websites/materials reviewed did not provide information on transportation assistance for PSEO students from low-income families
2. 85% of websites/materials reviewed did not provide up to date information about the 10th

grade PSEO option
3. 99% of websites/materials reviewed do not provide information on the availability of online PSEO courses

The Center for School Change conducted a follow-up study in March 2016 of these same stratified random samples of 87 school district and charter websites. This report, "Progress and Problems with PSEO," found improved quality of PSEO information on high school websites:
1. 90% of websites/materials provided information on transportation assistance for PSEO students from low-income families
2. 91% of websites/materials provided information about the 10th grade PSEO option
3. 90% of websites/materials provided information on the availability of online PSEO courses

During the 2019 Legislative session, the March 1st dissemination of information deadline was amended to require school districts to share PSEO information by either March 1st or three weeks prior to course registration for the next academic year (whichever comes first). This change was the result of testimony by PSEO students Asiya Browne, Zeke Jackson, and Mackenzie Pelowski that:
1. They didn't learn about PSEO until they had signed up for classes for the following academic year
2. Many colleges and universities opened PSEO applications as early as January of each year, leading some students to only learn about PSEO during end of college application periods

The last measurement of the PSEO Information Gap by the Center for School Change was detailed in a January 2020 report. This document, analyzing a stratified random sample of 95 high school websites was entitled, "Dual Credit: Opportunity and Equity Indeed." This study examined the high school website adoption rates of these recent amendments to PSEO law. Among other conclusions, the report found that:
1. None of the 95 websites mention the revised notification schedule provisions adopted by the 2019 Minnesota state legislature
2. 92 of 95 districts/charters did not provide all of the legislatively required "up to date" information about PSEO, such as the requirement that high schools must allow students to use high school computers and internet resources to take PSEO courses online

People for PSEO released our first report in our 2022 PSEO Information Gap Report. This report studied 390 district and charter schools that must share up to date information on their website. This report found that:
1. 40% of 390 websites were up to date and fully complied with state law
2. 44% of websites did not include the revised notification schedule provisions adopted by the 2019 Minnesota state legislature
3. 9% of 390 websites provided factually inaccurate information about PSEO
4. 7% of 390 websites didn't provide any information about PSEO

People for PSEO released its most recent report in our 2023 PSEO Information Gap Report. This report studied 390 district and charter schools that must share up to date information on their website. This report found that:
5. 42% of 390 websites were up to date and fully complied with state law
6. 44% of websites did not include the revised notification schedule provisions adopted by the 2019 Minnesota state legislature

7. 9% of 390 websites provided factually inaccurate information about PSEO
8. 12% of 390 websites didn't provide any information about PSEO at all

This report aims to build upon the foundation set by previous research on high school websites. Over the last eight years, the high schools studied in this report have been consistently reminded by the Minnesota Department of Education of their obligations to fully inform high school students about the PSEO program.

Methodology

Measuring website data is a low cost quantitative method of measuring the high school compliance with PSEO state law. This study was not designed to perform a comprehensive analysis of the variables that contribute to the PSEO Information Gap. Some of these variables might include, but are not limited to, technical website errors, a lack of high schools' understanding of the statutory requirements, or local district policies and procedures that limit awareness of the PSEO program.

This report reviews the same 390 Minnesota district and charter public school websites as 2023 to determine if they are sharing up to date information about PSEO law. Each school studied serves students in grades 9-12. People for PSEO obtained this list of districts and charter schools from the Minnesota Department of Education website. From this list, we removed schools that do not serve grades 9-12. Of the remaining 388 websites, 319 are tagged as Independent School Districts (ISD) and 69 are tagged as Authorized Charter Schools (LEA). To this list, we added Minneapolis Public Schools, South Saint Paul School District, and Career Pathways Charter School resulting in a total of 391 websites in this study.[1] A full list of the websites studied, as well as their compliance with PSEO law, can be found at the end of this report.

Question Analysis

The 391 websites were reviewed by People for PSEO staff and volunteers. Any missing or incorrect information is the sole responsibility of People for PSEO.

Factor 1: Is PSEO Information Complete?

The PSEO language shared by MDE with districts and charters is considered to be, 'the minimum to support this statute requirement.' As such, any district website that did not contain *all* of the following information was categorized as *not* up to date:

> *Postsecondary Enrollment Options (PSEO) is a program that allows 10th-, 11th- and 12th-grade students to earn both high school and college credit while still in high school, through enrollment in and successful completion of college nonsectarian courses at eligible participating postsecondary institutions. Most PSEO courses are offered on the campus of the postsecondary institution; some courses are offered online. Each participating college or university sets its own admissions requirements for enrollment*

---

[1]There are four exceptions to this methodology. The Minnesota Department of Education informed us that the Perpich Center for Recording Arts and Mn State Academies must follow subdivision 7, but are neither district nor charter schools. They are tagged as "ISD" for the sole purposes of this study. In addition, Minneapolis Public Schools and South Saint School Paul District were not included in the MDE list of Independent School Districts, but were included and tagged as "ISD" for the sole purposes of this study.

into the PSEO courses. Eleventh and 12th-grade students may take PSEO courses on a full- or part-time basis; 10th graders are eligible to enroll in PSEO on a more limited basis (see note below). Students must meet the PSEO residency and eligibility requirements and abide by participation limits specified in Minnesota Statutes, section 124D.09. If a school district determines a pupil is not on track to graduate, she/he may continue to participate in PSEO on a term by term basis.

By March 1 of each year, or three weeks prior to the date a student registers for courses for the following school year (whichever is earlier), schools must provide PSEO information to all students in grades 8-11 and their families. To assist the district in planning, a student must inform the district by May 30 of each year of their intent to enroll in postsecondary courses during the following school year.

There is no charge to PSEO students for tuition, books or fees for items that are required to participate in a course; however, students may incur fees for equipment that becomes their property when the course or program is completed, textbooks that are not returned to the postsecondary institution according to their policies, or for tuition costs if they do not notify the district by May 30 and the district does not waive this date requirement.

Funds are available to help pay transportation expenses for qualifying students to participate in PSEO courses on college campuses. For more information on these funds, [access the PSEO Mileage Reimbursement Program Instructions](#).

Enrolling in a PSEO course does not prohibit a student from participating in activities sponsored by the high school.

School districts must allow a PSEO student reasonable access to the high school building, computers and/or other technology resources during regular school hours to participate in PSEO courses, whether on-line or on campus.

Each year, districts must publish their grade-weighting policy on their website, including a list of courses for which students can earn weighted grades.

All courses taken through the PSEO program must meet graduation requirements. Districts must transcript credits earned in PSEO by a ratio prescribed in statute. Districts have the authority to decide which subject area and standards the PSEO course meets. If there is a dispute between the district and the student regarding the number of credits granted for a particular course, the student may appeal the board's decision to the commissioner. The commissioner's decision regarding the number of credits will be final.

Postsecondary institutions are required to allow PSEO students to enroll in online courses consistent with the institution's policy regarding postsecondary student enrollment in online courses.

Tenth-grade students may initially enroll in one Career and Technical Education (CTE) PSEO course if they receive a reading proficiency score of "meets" or "exceeds" on the 8th grade MCA. If 10th graders taking a CTE PSEO course earn at least a grade C in that class, they may take additional postsecondary courses. If the student did not take the MCA in 8th-grade, another reading assessment accepted by the enrolling postsecondary institution can be substituted. For students with disabilities, there is an alternative option to demonstrate reading proficiency.

For current information about the PSEO program, [visit the Minnesota Department of Education's Postsecondary Enrollment Options (PSEO) webpage](#).

By comparing this language to the information found on the high school PSEO page, staff and volunteers answered the following questions:

1. Is their PSEO information up to date?
   a. (Yes/No/Unsure)
2. What is the PSEO Page Status?
   a. (Up to date/Up to date AND inaccurate information/Missing information/Missing information AND inaccurate information/PSEO Page cannot be found/PSEO link is broken)

In cases where a staff member or volunteer marked 'unsure,' the website was elevated to Zeke Jackson, the Executive Director, to make a final determination on whether or not the PSEO information was up to date.

Factor 2: Why is PSEO Information Not Complete?

If the website was marked as either "Missing information" or "Missing information AND inaccurate information," the following questions were answered:

3. Does the website state that, "School districts must allow a PSEO student reasonable access to the high school building, computers and/or other technology resources during regular school hours to participate in PSEO courses, whether online or on campus"
   a. (Yes/No)
4. Does the website state that, "By March 1 of each year, or three weeks prior to the date a student registers for courses for the following school year (whichever is earlier), schools must provide PSEO information to all students in grades 8-11 and their families"?
   a. (Yes/No)
5. Does the website state that, "Funds are available to help pay transportation expenses for qualifying students to participate in PSEO courses on college campuses"?
   a. (Yes/No)

These three questions were chosen for specific reasons.
- First, districts have previously denied students reasonable access to school buildings and resources on the basis of their PSEO participation. This led to a change in state law that mandated that PSEO students must have reasonable access to the high school building. As a result, we were particularly interested in whether this information was being shared with students.
- The requirement that districts must provide PSEO information to all students in grades 8-11 by March 1st, "or three weeks prior to the date a student registers for courses," is the most recent change to PSEO state law and took place in 2019. By measuring whether a website includes this language, we can reasonably determine whether a website has been updated since this change in state law.
- Finally, access to transportation reimbursement funds is a critical piece of knowledge for many prospective PSEO students - especially low-income students. Anecdotally, People for PSEO has heard from current PSEO students that they were unaware of funds to assist with transportation expenses. By measuring whether a district shared this information, we can have a better understanding of whether students are receiving information about a critical piece of state law that is meant to improve equity to PSEO access.

Results: Website Analysis

Using the methods described above, this report concludes that 206 of 391 Minnesota high school websites studied (53%) do not provide all the up-to-date information as required by Minnesota's PSEO law. This is a decrease from 57% in 2023.

The Majority of Websites are Not Up to Date

Figure 1: Is the website up to date according to MDE's PSEO language requirement?

Website Category (2024 Report)	Total	% of Total	ISD	Charter
PSEO Page is up to date	163	41.7%	114	49
PSEO Page is up to date and has inaccurate information	22	5.6%	16	6
PSEO Page has missing information	122	31.2%	114	8
PSEO Page has missing and inaccurate information	54	13.8%	50	4
PSEO Page cannot be found	29	7.4%	26	3
PSEO Page link is broken	1	0.3%	1	0
Total	391	100%	321	70

In Figure 1, we categorized each website into six different categories. Figure 1 shows that 185/391 high schools, or 47%, contain all the PSEO information shared by the Minnesota Department of Education and required under state law. This was determined by adding the number of websites marked as "Correct and up to date" to the number of websites marked as "Correct and up to date; Contains inaccurate information." This can be done because a website can both a) comply with the mandatory requirements for sharing PSEO information and b) share additional information that is determined to be inaccurate. In other words, these categories are not mutually exclusive.

If the website contained some, but did not contain all required MDE information, we labeled it as 'missing information.' There were 176 websites that fit this criteria. This number can be found by adding the 122 websites categorized as "PSEO Page has missing information" and the 54 websites categorized as "PSEO Page has missing and inaccurate information."

Overall, we determined that 76 websites, or 19.4% of the 391 websites studied, were sharing inaccurate information about the PSEO program.

A website was labeled as 'PSEO Page cannot be found' after a thorough search was unable to find any PSEO information. Once this conditions was met, we concluded that either:
1. The high school does not have *any* PSEO information on their website, or
2. Their PSEO information is inaccessible to the average website user

When a high school website contained a link to PSEO information and the link was empty or produced an error, we categorized the website as, 'PSEO Page link is broken.'

Total Website Compliance Has Risen by 7% Since 2022

In Figure 2, we measure a slight increase in the number of websites that provide up-to-date information compared to our 2022 report. To reiterate, the website was marked "up to date" *only* if its PSEO Page Status was marked as "PSEO Page is up to date" or "PSEO Page is up to date and has inaccurate information."

Figure 2: What is the difference in compliance from 2022 to 2024?

Is the Website Up to Date?	2022 Report	2023 Report	2024 Report	Difference (2022-2024)
Yes	157	169	185	+28
No	233	221	206	-27
% Yes	40.26%	43.33%	47.31%	+7.05%
% No	59.74%	56.67%	52.69%	-7.05%

These numbers are broken into smaller categories in Figure 3. We see an increase in the number of up-to-date websites, although this is accompanied by an increase in the number of websites identified as sharing both up-to-date and inaccurate information. This can be mainly attributed to a change in our measurement process. In previous years, we did not negatively mark schools for inaccurate statements about 10th grade PSEO enrollment. This year, we did, and this is the main reason for growth in this category. For the same reason, some schools previously categorized as missing information are now marked as missing information and sharing inaccurate information.

Accompanying these changes are a change in the number of pages that can't be found and the number of links that are broken. This can be said to be a slight improvement over 2023.

Figure 3: What is the difference in PSEO Page Statuses from 2022 to 2024?

PSEO Page Status	2022	2023	2024	Difference (2022-2024)
PSEO Page is up to date	153	163	163	+10
PSEO Page is up to date and has inaccurate information	4	6	22	+18
PSEO Page has missing information	175	139	124	-51
PSEO Page has missing and inaccurate information	31	36	52	+21
PSEO Page cannot be found	25	36	29	+4
PSEO Page link is broken	2	10	1	-1

As demonstrated by Figure 4, the number of websites that are compliant with PSEO law has risen, but the number of websites that contain no information about PSEO at all has also risen. Please note that the sum of differences in the last column is "+1" instead of zero because of the addition of Career Pathways Saint Paul Charter School to this report in 2024.

Figure 4: To what extent are websites sharing all, some, or no PSEO information?

PSEO Page Status	2022	2023	2024	Difference (2022-2024
PSEO Page shares all required PSEO information *PSEO Page is up to date +* *PSEO Page is up to date and has inaccurate information*	157	169	185	+28
PSEO Page shares some required PSEO information *PSEO Page has missing information +* *PSEO Page has missing and inaccurate information*	206	175	176	-30
PSEO Page has no PSEO information at all *PSEO Page cannot be found +* *PSEO Page link is broken*	27	46	30	+3

We Recorded 76 Websites as Sharing PSEO Inaccuracies

We categorized websites as containing 'inaccurate information' if the information provided to students may contradict state law or mislead students about the nature of the PSEO program. This report categorized the following statements as inaccurate. Some statements were recorded more than once across different websites.

Many inaccurate statements recorded in 2023 were corrected by the time of publication of this 2024 report. However, inaccuracies around 10th grade PSEO enrollment requirements were overlooked during the 2023 PSEO Information Gap Report and need to be addressed moving forward. Websites were marked as providing inaccurate information about 10th grade PSEO enrollment if it did not state that 10th graders were eligible for PSEO, if they stated that 10th grade students may only take one PSEO course, or if they stated that 10th grade students may only take additional CTE courses after their first semester of PSEO.

Figure 5: What inaccurate claims were made about the PSEO program?

Claim on PSEO Page (2024)	Number of Counts
Inaccurate statements about 10th grade PSEO enrollment	64
Inaccurate statements about GPA eligibility	12
Inaccurate statements about May 30 notification deadline	1
Inaccurate statements eligibility for extracurricular activities	3

Websites Are Missing Recent Changes to PSEO Law

Figure 6 demonstrates that more than half of the websites studied in this report are missing recent amendments to PSEO law. PSEO law was most recently amended in 2019. Instead of sharing updated information about PSEO with students by March 1st, schools must now share updated information about the PSEO program by March 1st **"or three weeks prior"** to next year's course registration deadline. If a website fails to share this updated information, we may conclude that it has not been updated since 2019. By this measure, 47% of these websites *have* been updated in the past four years. It is also worth noting that 71.6% of websites studied did provide information about funds for transportation for low-income students.

Figure 6: Does the website include any of these statements (2024)?

	School districts must allow a PSEO student reasonable access to the high school building, computers and/or other technology resources during regular school hours to participate in PSEO courses, whether on-line or on campus. (Subd. 11b.)	By March 1 of each year, or three weeks prior to the date a student registers for courses for the following school year (whichever is earlier), schools must provide PSEO information to all students in grades 8-11 and their families. (Subd. 7.)	Funds are available to help pay transportation expenses for qualifying students to participate in PSEO courses on college campuses. (MDE)

Website Examples

Through these short examples, we hope to impress upon readers the wide spectrum of quality PSEO information available to students.

Up to Date Information: Cambridge-Isanti Public School District
Cambridge-Isanti Public School District website contains all information recommended by MDE. This website is marked 'up-to-date.'

Missing Information: Hutchinson Public School District
The PSEO page of the Hutchinson High School contains some information about PSEO but is missing critical information about the program. This website is marked as 'missing information.' Although it informs students that transportation funds exist for low-income students, it does not inform students that students must receive updated PSEO information by March 1st or three weeks prior to course registration. Their page also excludes information about how PSEO can access school buildings, use school technology to take PSEO classes, and that PSEO students can participate in school activities.

Inaccurate Information: Waseca School District
The PSEO page of Dawson Boyd School District contains some information about PSEO, but critical information about the program is missing. In addition, this page shares information that is potentially in conflict with PSEO statutes. Waseca School District's student contract states, "I can participate in extracurricular activities at EITHER the high school OR the post-secondary institution, NOT BOTH" and their PSEO Information Night presentation states that students must submit PSEO enrollment documents by May 17th, in contrast to the May 30th date found in state law.

Conclusion & Recommendations

This analysis of district and charter websites demonstrates that access to quality online information about PSEO is highly dependent on the school in which the student is enrolled.

A majority of schools studied **(**52.3%**)** do not meet the dissemination of information language requirements under state law as defined by the Minnesota Department of Education. Of the 391 websites studied, 30 websites (7.7%) do not include any PSEO information at all and 76 websites (19.4%) may share inaccurate information about the PSEO program.

These findings demonstrate that, after nearly a decade of consistent reminders by the Minnesota Department of Education, the majority of district and charter schools are not in compliance with state law. For this reason, we recommend the following steps to close the PSEO Information Gap:

1. The Minnesota Department of Education has already implemented mandatory reporting procedures through the Notice of Student Registration Form to ensure student eligibility for PSEO under state law. Similarly, we recommend that the MDE establish reporting requirements for high schools by mandating the annual submission of their PSEO webpage links and the specific dates on which they informed students and families about the PSEO program via printed materials. This measure would ensure that high schools are also adhering to the requirements found in PSEO state law.
2. That the Minnesota Department of Education should review and apply appropriate enforcement mechanisms (such as that found under MN Statute 127A.42) to district and charter schools that do not satisfy their statutory obligations.
3. That the Minnesota Department of Education conduct targeted outreach to schools whose websites have missing or inaccurate information about the PSEO program to ensure that they are actively working to improve their website.

Further research is needed to determine the extent to which this directly contributes to disparities in overall PSEO enrollment rates. For example, future research may attempt to identify a correlation between the participation rates of PSEO students per district and the quality of PSEO information available on their websites. Other research might work to understand the relationship between participation rates and school size or location. However, a lack of public data on PSEO enrollment patterns prevents such research from taking place**.** School districts are not required under state law to provide enrollment information about students enrolled in PSEO courses according to agreements. This student population may make up to 50% of all PSEO enrollment. This lack of public data on the PSEO program must be addressed to better measure the impact of the PSEO Information Gap on PSEO enrollment trends and on high school and college graduation rates.

With these new findings, People for PSEO recommends that the Minnesota Department of Education rethink their approach to enforcing PSEO law.

List & Status of High Schools

In the first column, "Number" refers to the order in which we reviewed school districts and charter schools. Our analysis was conducted in alphabetical order. In the second column, "Tag" refers to whether we identify the school district as an Independent School District (ISD) or as a charter school (Charter). The third column lists the name of the school district or charter school in question. The fourth column (PSEO Page Status (2023)) indicates the status of their PSEO page in *last year's* 2023 report, while the fifth column (PSEO Page Status (2024)) indicates the status of the PSEO Page in *this year's* 2024 report.
